## SUMMARY

I am an adaptable, conscientious, and ambitious individual, able to quickly acquire new skills. I thrive in high tech environments where my educational background and professional skills can be effectively utilized. I seek opportunities that offer challenges and enable me to contribute to cutting edge advancements while continuously growing in my career.

## PROJECT

**Artificial Teaching Assistant (ATA)** Nov 2023 - Nov 2024

**Description:**

An AI-powered platform that automates the role of a teaching assistant in programming courses. It helps students learn with quizzes, reports, and a chatbot, makes quiz and batch management easier for teachers, and gives admins tools to organize and manage users.

**Role:** Frontend Developer

**Responsibilities:**

- Developed and managed the frontend interface of the Artificial Teaching Assistant (ATA) platform according to project requirements.
- Implemented user-friendly designs for student, teacher, and admin features such as quizzes, reports, and chatbot support.

**Technologies:**

ReactJS , Tailwind CSS , NodeJS , Database ( MongoDB nosql ) , Ai Model ( Chatgpt-4o-mini ) , Aws Services (S3 bucket , Simple Notification Service) , VCS(Git , GitHub)

## EDUCATION

**Bachelor of Information Technology** 2020 - 2024
